PROFESSIONAL EXPERIENCE

Freelance Web Developer & SEO Specialist | Remote | 2020 – Present

Key Responsibilities:

- Build scalable WordPress and Shopify websites for businesses across e-commerce, education, and service sectors
- Conduct SEO audits, execute on-page & technical optimization, and manage long-term ranking strategies
- Develop custom dashboards, landing pages, and backend systems using React, PHP, and Magento 2 REST APIs
- Optimize website UX, speed, mobile responsiveness, and conversion flows
- Provide long-term maintenance, updates, bug fixes, and performance improvements
- Deliver Magento 2 REST API development and Android (Kotlin/Jetpack Compose) companion apps for client backend systems

Key Achievements:

- 171% Sales Growth — Men's Sexual Health Shopify Store (3 months)
- High-Performance WordPress Redesign → j7hub.com & ogrcs.com
- Complete Shopify Store Setup & Optimization → moshapparels.com
- School Website Design & Modernization → salemgroupofschools.com
- Built and maintain the WOW Pens Inventory Manager WordPress plugin for live stock and pricing operations

PROJECTS

Penhouse.in — Magento 2 Repair Management System — Backend / API Developer

Tech Stack: Magento 2, PHP, REST API, MySQL, Postman, Swagger/OpenAPI

- Built the Pen\Repair module REST API — createRepair, status transitions, customer authentication, and dashboard stats endpoints
- Authored Postman collections (v1–v4) and Swagger/OpenAPI documentation for API consumers
- Fixed core repository bugs: assigned_to_me query logic, status transition map, and customer DTO deserialization
- Extended db_schema.xml with new customer columns and handled Magento CLI deployment via SSH

PenRepair — Android Companion App — Android Developer (Kotlin / Jetpack Compose)

Tech Stack: Kotlin, Jetpack Compose, OkHttp, REST APIs

- Implemented forgot password flow, camera/gallery chooser, and customer search by phone, email, and name
- Added CSV export, deep linking, and configurable OkHttp network timeouts
- Resolved DTO serialization mismatches between snake_case API responses and camelCase Kotlin models
- Shipped multiple build and CI fixes via GitHub Actions

Pen House Inventory Audit App — *Android Developer*

Tech Stack: Android (Kotlin), REST API

- Built a SKU detail drill-down screen for granular inventory auditing
- Fixed the quantity confirmation dialog and implemented a Forgot Password feature

WOW Pens Inventory Manager — *WordPress Plugin Developer*

Tech Stack: WordPress, PHP, WooCommerce, JavaScript, Select2

- Developed per-row GST rate management with configurable dropdowns
- Integrated Select2-powered SKU search for fast inventory lookup
- Built WooCommerce price sync triggered on purchase approval
- Designed a complete custom admin CSS stylesheet for the plugin interface

WOWPens.in — Custom Product Customization Platform — *Frontend Engineer / WordPress & React Integration*

Tech Stack: React, JavaScript, TypeScript, WordPress, WooCommerce, REST API, CSS

Live Site: <https://wowpens.in>

- Built and integrated a React-based product customization interface into a live WooCommerce store
- Extended real-world frontend logic to support dynamic product options (materials, colors, engraving, etc.)
- Debugged and resolved complex state, rendering, and data-persistence issues
- Validated customization outputs before checkout to ensure accuracy

j7hub.com — WordPress Blog & Business Website

Tech Stack: WordPress, Elementor, PHP, CSS, HTML, SEO

- Built full website structure, responsive layout, and UI/UX
- Wrote and managed blog content for SEO and engagement
- Configured SEO settings, metadata, indexing, and sitemap

Moshapparels.com — E-commerce Store

Tech Stack: Shopify, Liquid, CSS, HTML, WooCommerce, SEO

- Developed Shopify store structure and customized theme
- Created product pages, custom sections, and optimized checkout UX
- Integrated payment gateways and implemented SEO best practices

OGRCS.com — WordPress Website Rebuild

Tech Stack: WordPress, Elementor, PHP, CSS, HTML, SEO

- Rebuilt website layout and responsive UI/UX
- Implemented SEO improvements, indexing setup, and sitemap configuration
- Optimized website performance and page speed

Salem Group of Schools — School Website Modernization

Tech Stack: WordPress, Elementor, PHP, CSS, HTML

- Redesigned website layout and navigation for responsive UI/UX
- Integrated CMS features for easy content updates
- Ensured mobile-friendly and fast-loading pages

EDUCATION

Federal University of Technology, Owerri (FUTO)

B.Tech — Industrial Chemistry | 2016 – 2021

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals — [Certificate Link](#)
- Business Management and Personal Relationship Management — Taraba Business School (2022)
- Google Digital Marketing & Google Workspace
